# Lunch & Learn/Seminar: EasyPanel (45mins) OMIQ (45mins)

Essential package for modern flow cytometrists

Thursday 10/2 at 12 – 2PM  
CGRC Room 451, Gainesville, FL 32610 US  
Registration Mandatory [HERE](#)

## Learn about the latest features and updates.

- [EasyPanel V2](#) is a fully automated panel design and QC tool, integrated with a smart antibody Stock management system and with OMIQ, recently acquired by Dotmatics (parent company of OMIQ, GraphPad Prism...). UF has a site license for EasyPanel accessible to all.
- [OMIQ](#) is a cloud-based modern cytometry analysis platform bridging machine learning and analytical pipelines with classical manual analysis, integrated with GraphPad Prism and EasyPanel. It differentiates from FlowJo by not relying on your computer's processors for analyzing data, fully integrating with clustering, dimensionality reduction, normalization algos and therefore not requiring any plugins and by enabling cloud data sharing and operations.

Trusted by leading flow cytometrists worldwide
