## University of Florida ICBR Seminar Announcement

### Accelerate Protein Production

See how eProtein Discovery™ makes protein accessible to accelerate your research

Nuclera's novel eProtein Discovery™ system, a benchtop instrument that harnesses the potential of digital microfluidics and cell-free systems to enable you to go confidently from DNA to active, soluble, purifiable proteins in 48 hours.

#### The Seminar will include:

- eProtein Discovery™ Core Technology Overview
- Case studies of challenging proteins purified by eProtein Discovery™
- eProtein Discovery Cloud Software Demonstration
- Future Applications
